

# Life Saving Rules Policy

At Borr Drilling, the safety of all our personnel is our number one priority.

**In alignment with our unwavering commitment to ‘zero harm’ and the pursuit of one safe day at a time, we rigorously uphold the following nine (9) Life Saving Rules:**

- ▷ **Bypassing Safety Control** – Prior to overriding or disabling safety controls, a Permit to Work, supported by a detailed risk assessment must be obtained.
- ▷ **Confined Space** – Prior to entering a confined space, obtain a Permit to Work, supported by a detailed risk assessment.
- ▷ **Driving** – Strictly adhere to the Borr Drilling’s Driving Safety procedure.
- ▷ **Energy Isolation** – Confirm isolation and ensure zero energy presence before beginning work.
- ▷ **Hot Work** – Prior to starting any work, flammable materials and ignition sources need to be identified and the risks controlled.
- ▷ **Line of Fire** – Keep yourself and others out of the line of fire.
- ▷ **Safe Mechanical Lifting** – Plan and control lifting operations and manage the surrounding area for safe mechanical lifting.
- ▷ **Work Authorisation** – Perform work activities with a valid permit when the nature of the job requires it.
- ▷ **Working at Height** – Implement protective measures to prevent falls and DROPS.

**We expect all personnel, employees, and contractors, to strictly adhere to these rules while working at Borr Drilling rigs and facilities.**

To support personnel to ensure compliance we will:

- ▷ Provide training on Life Saving Rules.
- ▷ Ensure that our workforce is competent to execute assigned tasks in accordance with the Rules.
- ▷ Provide conducive work conditions that enable everyone to adhere to these Rules.

Management fully supports the use of the Stop Work Authority by anyone.
